

A mobile display system consisting of a metal frame with wire mesh panels, mounted on a track system on a dark floor. Several framed artworks are displayed on the mesh panels. The background is a red brick wall. A magenta banner with white text is overlaid on the right side of the image.

# ArtStor™ Mobile System

***datum***

# Truly a work of art...

Whether you're a museum with artwork to house for rotation or just a personal art collector with more pictures than you have wall space, we give you the ArtStor™.

Designed specifically to hang virtually any size piece of framed or unmounted artwork in any fashion, the unique mesh frames of the system allow for the specially designed hooks to hang anywhere, giving you free reign to organize your art as you please.

Reduce floor space usage by 50% or more with our new track design. Carriages can sit side by side on one track, or opt for our two track design to nest carriages together, saving even more space.

The bumpers on the carriages and the way the framework is designed ensure that there is enough space between them to keep artwork from being damaged when carriages are racked together.

The heavy duty support bars prevent the frames from swaying, eliminating any jostling of framed pieces while the carriages are in motion.
